

KLENZKLOR TABS

Effervescent chlorine release tablets

DESCRIPTION & APPLICATION

KLENZKLOR TABS are effervescent fast chlorine release tablets for use as a terminal disinfectant, where accurate and controlled dosing is required.

A unique feature of **KLENZKLOR TABS** are their stability: when stored properly in the original plastic tub **KLENZKLOR TABS** are stable for up to 2 years and will consistently give reliable chlorine solutions.

KLENZKLOR TABS are suitable for use in the food and beverage industries and on most common materials.

USE INSTRUCTIONS

One **KLENZKLOR TAB** dissolved in one gallon (4.55 litres) water will give a solution containing 200 ppm Available Chlorine, which is suitable for general disinfection purposes.

The use of KLENZKLOR TABS must always be followed by rinsing with potable water to avoid any risk of contamination.
