

LICHEN REMOVER

REMOVE LICHENS QUICKLY AND EASILY

Cleantecs
QUALITY. MADE IN GERMANY

THE EASY LICHEN REMOVAL

Our lichen cleaner is equipped with 5 rotating point steel nozzles. With their super-fine jets, lichens are removed reliably and with ease from the PV module without any additional means. The lichen cleaner can be flexibly controlled in terms of cleaning distance and cleaning direction via our modular pole system. Due to our mechanical height control, the distance of the nozzles to the PV module always remains the same, and, thus, the cleaning result is also consistently excellent.

SPECIAL FEATURES

- ▶ Nozzles with rotating point jet
- ▶ Constant cleaning distance
- ▶ Good controllability
- ▶ No additional chemicals required
- ▶ Variable handle length with modular pole
- ▶ Cleaning width 400 mm
- ▶ Only 10 l/min water flow
- ▶ Can easily traverse obstacles that are in the way

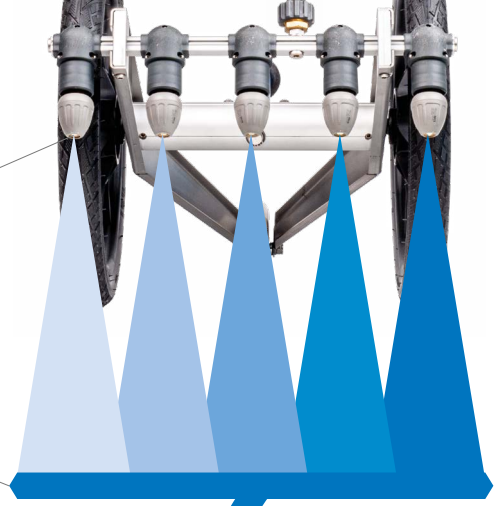

Technical data

Cleaning width	400 mm
Working pressure	100 - 120 bar
Weight	5.6 kg
Temperature max.	40 °C
Water consumption	10 l/min
Item no.	0201830

Flow rate 10 l/min

Cleaning width 400 mm

Flexible steering

Large tilt range

Customisable cleaning distance

Can easily traverse obstacles that are in the way

Constant cleaning distance
